UNIVERSITY OF CALIFORNIA SAN DIEGO

My title here

A dissertation submitted in partial satisfaction
of the requirements for the degree
Doctor of Philosophy

in

Bioinformatics & Systems Biology

by

Author Name

Committee in charge:

Professor One, Chair
Professor Two, Co-Chair
Professor Three
Professor Four
Professor Five

2023

The Dissertation of Author Name is approved, and
it is acceptable in quality and form for publication
on microfilm and electronically.

University of California San Diego

2023

DEDICATION

. . .

This dissertation is dedicated to . . .
and *Person.*

EPIGRAPH

This is an epigraph
about epigraphs.

ABSTRACT OF THE DISSERTATION

My title here

by

Author Name

Doctor of Philosophy in Bioinformatics & Systems Biology

University of California San Diego, 2023

Professor One, Chair
Professor Two, Co-Chair

An abstract should provide a clear impression of the content and major divisions of the dissertation or thesis. Abstracts of doctoral dissertations must not exceed 350 words.

Introduction

Introduce the topic of your dissertation. What is the problem you solved? Why is it important?

0.1   Title of Chapter 1

Set the stage for this chapter. Provide background to the field and relevant citations. Provide a high level summary of what you did and what you found.

0.2   Title of Chapter 2

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed euismod, nisl quis aliquam ultricies, nunc nisl aliquet nunc, sed aliquam nisl nu.

0.3   Title of Chapter 3

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed euismod, nisl quis aliquam ultricies, nunc nisl aliquet nunc, sed aliquam nisl nu.

0.4   Conclusion

Briefly summarize your dissertation with your takeaways and future directions.

Chapter 1

Title of first chapter

Brief summary of this chapter here.

1.1 Introduction

Text here.
Figure 1.1. Figure caption detailing subpanels as necessary.

1.2 Results

1.2.1 Subsection title

1.4.2 Resource availability

Lead contact

Further information and requests for resources and reagents should be directed to and will be fulfilled by the lead contact, Professor One (email@gmail.com).

Materials availability

Plasmids generated in this study are available upon request.

1.4.3 Experimental model and subject details

Tunicates

Adult *Ciona intestinalis type A*, also known as *Ciona robusta*, were obtained from M-Rep and were maintained under constant illumination in seawater (obtained from Reliant Aquariums) at 18°C. *Ciona* are hermaphroditic, therefore there is only one possible sex for individuals. Age or developmental stage of the embryos studied are indicated in the main text.

1.4.4 Method details

Library Construction

Details here.

GFP reporter assays

Details here.

1.5 Data and code availability

Any additional information required to reanalyze the data reported in this paper is available from the lead contact upon request.

1.6 Acknowledgments

Chapter 1, in full, is a reformatted reprint of the material as it appears in "Paper title" Author A. One, Author B. Two. *Science*, 2023. The dissertation author was the primary investigator and co-first author of this paper.

1.6.1 Author contributions

A.A.O. designed experiments. A.A.O. and A.B.T. conducted experiments. A.A.O. analyzed data. A.A.O. and A.B.T. wrote the manuscript.

1.6.2 Declaration of interests

The authors declare no competing interests.
